**Venue: (New) MASA office, Building D
80 Payneham Road, Stepney, 5069**

Cost \$125 for the day (or \$110 for MASA members) includes refreshments

Workshop Description:

For the last 15-years Australia's performance on the PISA (Program for International Student Assessment) maths test has been in decline. What we are doing is clearly not working. This year's curriculum update is a step in the right direction with an increased emphasis on reasoning and problem solving. However, what we really need is a fundamental rethink about why we teach maths. Our desire is to equip teachers to share the beautiful and meaningful ideas of mathematics. To communicate the higher purposes of learning to think well, developing creativity and embracing struggle. We would like to share a vision of how this can be done. Change begins with teachers like you; courageous leaders willing to take risks and re-imagine maths in the service of your learners.

If you're a middle years teacher or maths leader who wants to be inspired and empowered to inspire students in the maths classroom, this symposium is for you. [Click here](#) for overview of the day.
